

Since June 2025, the monthly analysis of energy storage projects has been divided into two sections: "Source Network Side Market" and "User Side Market," highlighting the distinct ...

Abstract: Aiming at the problem of how to measure the investment of energy storage systems under the Energy Performance Contracting (EPC), this paper proposes a comprehensive and effective lean ...

By utilizing CVaR, this study offers practical solutions to optimize user-side energy storage investments, enabling investors to maximize returns while minimizing losses.

According to project filing data, both the total capacity and the number of newly registered user-side energy storage projects in September exceeded those of the same period last year -- up ...

Despite the growing number of user-side energy storage projects in operation, many people still lack a clear understanding of this technology. In essence, user-side energy storage refers ...

In this study, the author introduced the concept of cloud energy storage and proposed a system architecture and operational model based on the deployment characteristics of user-side energy ...

This paper proposes a method to optimize the configuration of user-side energy storage, addressing the challenges of identifying energy storage demand and the limited revenue channels.

To address these challenges, this study proposes a user-side cloud energy storage (CES) model with active participation of the operator. This CES model incorporates adjustable time ...
