

The NetSure 7100 Series of DC power systems require low initial investment with a scalable configuration that allows for incremental system growth.

From major switching and data centers to remote shelters and computer rooms, Vertiv NetSure DC power systems have the features and proven performance to match your network application needs.

The PowerDirect Rack provides a high-density, scalable DC power solution designed for modern data centers and Open Compute ORV3 environments. This modular system offers up to 132 kW per rack ...

The modular NetSure 710 power system with 3000 watt rectifiers and 1500 watt DC to DC converters provides up to 2000 amps of current for +24 volt systems with up to 500 amps at -48 volts.

This efficient, reliable family of AC to DC power systems for critical HVDC power applications combines the proven benefits of 48V DC power - modularity, scalability, ease of integration - with the cable ...

Vertiv's extensive range of holistic DC Power Systems, including the NetSure DC Power technology platform, delivers the most innovative and dependable network-power applications, with an ...

Vertiv DC power products offer both efficient power protection with unit-level redundancy and easy connectivity with renewable energy sources. NetSure DC Power Solutions have you covered for ...

Discretely power critical infrastructure at the edge of your network with optimized management, security, and control. This series of flexible DC power systems is designed for wireless access and fixed ...

This modular system offers up to 132 kW per rack with high-efficiency power supply units (PSUs) that operate from an AC or HVDC input source. The flexible design ...

From major switching and data centers to remote shelters and computer rooms, Vertiv DC power systems have the features and proven performance to match your network application needs.

Ensure constant availability and maximum energy efficiency with Vertiv's DC Power Systems. Discover innovative and dependable network-power applications with unit-level redundancy.

The NetSure 7000 Series of DC power systems is ideal for applications ranging from radio base stations and small offices to large office and data center facilities requiring high power efficiency, reliability ...

Introducing the Vertiv R48-1000E3, a cutting-edge 48V high-efficiency DC power supply system engineered

for telecommunications, data centers, and industrial facilities.

Advances in power conversion technologies and increasing use of DC-based equipment at core sites has driven 12V and 400V DC power distribution to become a safe and viable alternative to traditional ...
