

The battery will soak up and store cheap renewable energy during the day that can be pumped back into the electricity grid at times of peak demand, helping to deliver cheaper energy bills ...

The Victorian Government has approved the state's largest-ever battery storage project - a one-gigawatt facility that it says will deliver cleaner, cheaper, and more reliable renewable energy ...

The project includes over 212,000 photovoltaic solar panels generating 119MW of solar power, capable of generating 242,000 MWh annually. Energy Vault's integration of a grid-forming ...

The Victoria government in Australia has approved a 300MW/1,200MWh battery energy storage system (BESS) in Gippsland and a 332MW solar PV power plant with integrated storage in ...

The Australian Capacity Investment Scheme (CIS) is set to bolster energy storage capabilities in Victoria and South Australia with support for six new large-scale battery projects.

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as it seeks to accelerate the development of projects to ...

Touted to be one of the largest battery installations globally, the hub can supply electricity to as many as 200,000 households during the evening peak demand period in Victoria.

In 2017, the Victorian Government announced a \$25 million Energy Storage Initiative. The Energy Storage Initiative supported energy storage technologies and projects to: enhance system ...

The government of Victoria has awarded fast-tracked approvals for two new battery energy storage system (BESS) projects with a combined capacity of 700 MW, it said on Monday.
