

Wiener Linien is working alongside Wien Energie to test innovative, plastic solar films on the flat roof of the Ottakring metro station. Vienna's first solar roof is made with special bifacial glass-glass solar ...

The Solarvolt BIPV glass system replaces traditional facade cladding materials and enhances commercial building exteriors by providing sunshading, overhead glazing, CO2-free power ...

The research museum with over 270 years of history is located a listed building in the centre of Vienna, on the roof of which a solar system with particularly durable glass-glass modules ...

In 2024, we received funding approval from the Climate and Energy Fund as a model and flagship photovoltaic project for the integrated PV facade on the Panorama Rotunda. and with an ...

Colour-coordinated sun shading glass enhances The Rock's facade by the Danube Canal, Vienna, offering energy efficiency and a stunning design.

The City of Vienna has launched an initiative to develop solar energy to increase the city's solar production fivefold by 2025. Ningbo Raytech specializes in double glass solar modules ...

The photovoltaic pergola with integrated semi-transparent glass-glass PV modules provides shade while simultaneously producing solar electricity and offering a spacious amenity area with a relaxed ...

Our electric glass uses the latest smart glass technology to change glass from transparent to opaque and back again on demand, making it ideal for privacy, shading, and solar control.

Summary: Explore how Vienna's iconic pitched roofs are transforming into solar energy hubs. This article breaks down the benefits, challenges, and real-world applications of photovoltaic (PV) panel ...
