

What are the grid connectivity requirements for power projects in Vietnam?

Connection to the Power Grid: Grid connectivity requirements for power projects in Vietnam are governed by Circular No. 05/2025/TT-BCT, issued by the MOIT. This circular sets out the technical requirements applicable to the electricity transmission and distribution systems.

Is T&T launching a joint-venture battery storage project in Vietnam?

Notably, T&T Group, a major renewable investor with a portfolio of over 2,800MW across wind, solar, and LNG-to-power projects in Vietnam, recently announced a plan to launch joint-venture battery storage products in 2026, aiming to build Vietnam into a manufacturing and technology hub for renewable energy equipment.

How much solar power does Vietnam need?

Solar power capacity targets have been raised to between 46,459 MW and 73,416 MW. BESS capacity will support this growing share of solar and wind power in Vietnam's energy mix, helping to stabilize the grid and manage peak demand.

Is Vietnam a key player in the global battery supply chain?

Vietnam has significant nickel and cobalt reserves, making the country well poised to become a key player in the global battery supply chain with government support and international cooperation.

Vietnam en chiffres : capitale, population, superficie, langue, chef d'Etat, sites inscrits à l'Unesco, secteurs de l'économie.
