

Energy storage plays a key role in balancing power supply and demand, enhancing power reliability, and increasing renewable energy integration on the island. The EVNHCMC BESS system, ...

Vietnam sharpened its national energy-storage roadmap this week as government leaders, technical agencies, utilities, and industrial operators aligned on the next phase of Battery ...

Towards the 2050 vision, Vietnam aims to reach approximately 96 GW of BESS capacity. To advance this goal, Vietnam Electricity (EVN) is considering assigning its five power corporations ...

The Ho Chi Minh City Energy Storage Project demonstrates Vietnam's commitment to sustainable urbanization. By balancing cutting-edge technology with practical implementation strategies, this ...

The partnership will establish a full-chain energy application ecosystem, covering products, localized services, and market resources, to deliver safe, efficient, and sustainable C& I ...

Driven by favorable policies and ongoing energy structure upgrades, the Southeast Asian solar and storage market is seeing rapid growth, attracting global players in the new energy sector.

Among the key objectives were the upgrade of the power transmission and distribution system, acceleration of the roadmap to build a smart power system, and development of an energy storage ...

Recently, ESEC has successfully implemented the project "Pilot construction of a microgrid with integrated renewable energy (PV) and battery energy storage system (BESS) " at the Data Center of ...

Co-funded by a grant from U.S. Mission Vietnam, the pilot project will demonstrate how energy storage can help Vietnam integrate more renewable energy into its power system to meet ambitious climate ...

In this commercial project in Ho Chi Minh City, Vietnam, we deployed an advanced energy storage system specifically designed to address the city's peak electricity prices and frequent power outages.
