

Expect to see a large expansion in solar energy projects in the next five years, alongside more wind farms and the new battery farm in Northland. Roan says the investment in renewables will ...

A new Singapore-backed battery storage player in Australia has signed contracts for its first project, and has plans for 6 GWh of storage by the end of the decade.

If you've ever wondered how cities like Wellington keep the lights on during storms or why your neighbor's solar panels never seem to waste a drop of sunshine, you're in the right place.

In conclusion, as Fluence embarks on this landmark project with AMPYR Australia, it not only sets a precedent for future battery storage initiatives but also demonstrates the potential for ...

Coupled with cutting-edge energy storage solutions, these systems offer enhanced grid independence and power continuity, enabling facilities to store surplus energy and use it when it's needed most.

The Wellington Battery Energy Storage System (BESS) will store excess renewable energy ready for use by homes and businesses during peak times. BESS projects play an important role in the future ...

The Wellington Battery Energy Storage System project consists of a grid-scale BESS with a total anticipated discharge capacity of 500MW and a storage capacity of 1,000MW hours. ...

The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a ...

This study analysed the wind and solar behaviour at multiple locations across New Zealand, modelling the generated wind and solar power from theoretical systems.

Front End Solar is an engineering consultancy company based in Wellington, New Zealand and active internationally. We specialise in solar, wind and hybrid renewable energy solutions, from resource ...
