

When will photovoltaic panels be available

Even with the sunset of Section 25D and the shortening of 48E's full applicability, we believe solar panel systems will still be worth it in 2026 and beyond for the vast majority of U.S. owners of single ...

Solar panel technology is undergoing a rapid, disruptive evolution, pushing boundaries in efficiency, materials, and integration. Improvements in cell performance, the use of novel materials ...

While there are no guarantees, in some markets installations can still occur in 2025 if contracted before the end of August. The solar team is working with installation partners and ...

As of Oct. 28, 2024, more than 9.4 GW (75% of the tariff-rate quota) of cells have been imported. Presentations are available for download in PDF format below. Each quarter, NREL conducts a ...

The federal solar tax credit for homeowner-owned systems is no longer available. If you're reading this after 2025, use this article to understand how the credit changed--and evaluate ...

The Residential Clean Energy Credit equals 30% of the costs of new, qualified clean energy property for your home installed anytime from 2022 through December 31, 2025. The credit is not available for ...

Through December 31, 2025, federal income tax credits are available to homeowners, that will allow up to \$3,200 to lower the cost of energy efficient home upgrades by up to 30 percent. In addition to the ...

Solar panel technology in 2026 is advancing fast with tandem cells, bifacial panels, smart systems, and higher efficiency designs.

Congress and President Trump just passed legislation to cut the 30% residential solar tax credit in 2026--nearly a decade ahead of schedule. For homeowners considering solar, act now to ...

In Q3 2025, the residential segment installed 1,088 MWdc of solar capacity, declining 4% year-over-year and quarter-over-quarter. Despite an industry rush to bring projects online this year to ...
