As one of the leading solar panel suppliers in UK, we stock a wide range of UK solar panels, including solar modules for sale and even solar cells for sale UK.

How much does a solar system cost in the UK?

Average-sized households in the UK will require a 3 or 4kW solar system. A 4kW system produces a solar panel output of 3,400kWh per year and costs approximately £6,600 - £8,100. This can cover the average annual electricity consumption of a household (2,700kWh, according to Ofgem) by between 105% and 120%.

Do solar panels work in the UK?

Solar panels work perfectly fine in UK weather, including the winter. Despite fewer sunshine hours than a lot of other countries, a 4kW system can be sufficient to meet the average monthly energy consumption in the UK and compensate for the less sunny winter days.

Are solar panel kits affordable?

Solar panel kits and DIY solar kits are becoming increasingly affordable, with many governments and organizations offering incentives for installing them!
