

Where to complain about rural solar power generation

U.S. and Mexico Reach Agreement to Permanently End Tijuana River Sewage Crisis Administrator Zeldin signed a Memorandum of Understanding with Mexico to urgently solve the ...

The U.S. Department of Energy (DOE) designed this Solar Power in Your Community guidebook to assist local government officials and stakeholders in boosting solar deployment.

For each state, we created an overview of current and past state law on the placement and regulation of wind and solar power, and a list of counties that currently have blocks.

If you are having difficulties with your solar installation or contractor, we recommend these resources. The Attorney General's office addresses all types of complaints. Contact the AG Public Inquiry Unit: If ...

For example, a county may require both height limits and lengthy setbacks for wind turbines, or a city may limit a ground-mounted solar system's location within a property while also limiting that system ...

Citizens for Responsible Solar is part of a growing backlash against renewable energy in rural communities across the United States.

In Franklin County, a group of locals are concerned about potential environmental harm from renewable energy facilities and support a bill that would impose more regulations on solar and ...

Solar farms are seen as a way to increase energy capacity from non-polluting source. But their expansion into rural areas sparked a dispute in the state Senate.

Local governments throughout the Midwest and Great Plains have moved to restrict such projects in recent years. As the number of wind and solar farms increases, so does opposition in the ...

Explore 10 reasons why industrial-scale solar isn't right for agricultural-rural areas, from storm water concerns, the environmental concerns, soils concerns, loss of historic sites concerns and reduced ...
