

Wind and photovoltaic energy storage plan announcement

A new, floating pumped hydropower system aims to cut the cost of utility-scale energy storage for wind and solar farms.

Dominion Energy Virginia (DEV) is seeking proposals for the acquisition of new solar, onshore wind and energy storage development projects in Virginia. The company hosted an informational webinar for ...

The Department of the Interior today announced that the Bureau of Land Management (BLM) is advancing nine solar projects on public lands that could potentially power nearly 2 million ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

Today's announcement underscores President Biden and Vice President Harris' commitment to expanding access to affordable renewable energy and high-quality jobs in renewable ...

Although developers have added natural gas-fired capacity each year since then, other technologies such as wind, solar, and battery storage have become more prevalent options for new ...

In the second quarter of 2024, US developers put into operation 33 energy storage projects in 10 states with an installed capacity of 2.9GW. The cumulative installed capacity of energy ...

Federal agencies are delaying approvals for renewable energy projects on both federal land and private property at a time when electricity demand is going up.

Shanghai has approved the Fengxian 1# offshore photovoltaic project, the first commercial-scale solar-wind hybrid of its kind in China. The move marks a major step forward in the ...

On the heels of two years of modest numbers of new wind energy, solar energy and energy storage projects in Canada, the Canadian Renewable Energy Association (CanREA) expects 2026 ...
