

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

The first half of 2025 has been a defining period for the global wind energy sector - not only for its record-breaking growth but for the clarity it provides about the world's energy direction.

Awesome weather forecast at WOW it appears that you are offline :- (

Wind has advanced to become the main source of renewable power generation in the U.S., ahead of conventional hydropower. Recent years have seen significant increases in U.S. clean ...

Solar and wind accounted for 91% of new US electrical generating capacity added in the H1 2025, according to data just released by the Federal Energy Regulatory Commission (FERC), ...

Weather radar, wind and waves forecast for kites, surfers, paragliders, pilots, sailors and anyone else. Worldwide animated weather map, with easy to use layers and precise spot forecast.

Across the EU, photovoltaics surpassed coal-fired power generation for the first time in 2025. Wind power was the strongest net electricity producer in Germany, although production was ...

Rain in Wind kt Wind gusts kt Wind dir. ... N35°41'27" and W100°38'16" America/Chicago (-06:00) Sunrise: 7:39 AM

This report analyses changes in global electricity generation from January to June 2025 compared with the same period last year to measure the progress of the global clean energy transition.

Rio de Janeiro weather forecast. Meteogram, airgram, wind, clouds, temperature, humidity and dew point forecast. ECMWF, WRF, GFS, NAM, NEMS and other forecast models.

Worldwide animated weather map with layers, precise forecasts, METAR, TAF, NOTAMs for airports, SYNOP codes from stations and buoys, and forecast models.

Worldwide solar and wind power generation has outpaced electricity demand this year, and for the first time on record, renewable energies combined generated more power than coal, ...

Overview Commercialization of wind power History Economics National trends Wind power by state Offshore wind power Wind energy meteorology Since 2005 many turbine manufacturing leaders have opened U.S.

facilities. Of the top 10 global manufacturers in 2007, seven - Vestas, GE Energy, Gamesa, Suzlon, Siemens, Acciona, and Nordex - have an American manufacturing presence. REpower is another manufacturer with notable usage in the United States.

China's installed wind power generation capacity has consistently ranked first in the world for an impressive 15-year streak, according to the latest data released by the China Electricity ...

Windy provides real-time wind maps and accurate weather forecasts with user-friendly layers and precise spot forecasts.

In March and April of 2024, electricity generation from wind exceeded generation from coal, once the dominant source of U.S. electricity, for an extended period for the first time.
