

The present utility model relates to the technical field of wind power generation. Disclosed is a control cabinet for a wind turbine generator.

Control and monitoring solutions with in-house technology for the complete wind turbine.

Control cabinet nacelle for DeWind 9.2 wind turbines in new and unused condition. Control cabinets are located in the U.S. and ready for transport.

The machine-side converter rectifies the three-phase AC output from the fan-motor stator to DC to achieve stable DC voltage output under the conditions of different wind speeds and rotational speeds ...

With access to a wide range of products from various manufacturers, we can help you find the right spare part and accessories for your wind turbine.

It provides local and remote human-machine interface, supports a variety of industrial communication protocols, monitors and records the grid, wind conditions and turbine operation in real time, and ...

The cabinet is made of high-strength, corrosion-resistant metal material. It integrates yaw, generator, and pitch control functions, allowing for precise adjustment of the wind turbine direction and blade ...

Control cabinets house the electrical and automation components responsible for regulating your turbine's operation. They monitor and manage everything--from rotor speed and ...

By using our seals, you can handle high cable density and reduce the size and weight of the cabinets. Save time and labor with sealing solutions prepared for last minute changes.

Fibox provides leading wind turbine manufacturers with a selection of NEMA 4X boxes ranging from standard enclosures to customized cabinets, as well as entirely custom-made enclosure designs to ...
